Summary

Hi, I'm Marko

Front-end developer with over six years of experience creating cutting-edge, responsive web solutions.

My biggest career accomplishment was being entrusted with implementing the foundational architecture for an important web application, resulting in a scalable and maintainable codebase.

Looking to further develop my expertise in fullstack technologies and improve my skill set to create more efficient and scalable web applications.

Education

Professional Bachelor's degree, Electrical engineering and computer science

Faculty of Technical Sciences Čačak
Completed in 2022

Experience

Medior Front-end developer

Megatrend a.d.
Sep 2020 - Present

- Designed and implemented new features for existing projects.
- Worked on ten projects of various sizes.
- Mentored five team members, allowing them to advance professionally.

Project Highlights:

- **Finance Application:** Assigned by management to set up the foundational architecture of a monorepo application that integrates four distinct projects into one cohesive platform. The application now features over 200 pages and is developed by a team of about 12 developers.

- **E-commerce Applications:** As the sole developer, built and maintained for about four years a client's ASP.NET web shop for wholesale and retail customers with over 10,000 regular users, including a full rebuild from scratch. Also built an earlier web shop.

Skills

JavaScript TypeScript MySQL

React Next.js Vue Nuxt.js Node.js Express ASP.NET Astro

Packages:

Tailwind React Hook form Zod Zustand Drizzle Redux tRPC Storybook Jest

AI tools:

I use AI tools in my development workflow, mainly Claude for programming tasks.

Personal Projects

Website blocker

Developed a Chrome extension to block specific websites or URLs, allowing users to set their own blocking rules.

Technologies: React / Chrome API

My documentation

Developed a web application to display and share useful knowledge and insights. Pages are written in MDX files that are generated into web pages.

Technologies: React / Next.js / Tailwind CSS / TypeScript / MDX
